DESIGNING THE SPANISH CIVIL WAR | Maura Kelly

Artist statement

[Designing the Spanish Civil War](#) is a book about transference in and out of the archive. Visually, the book is inspired by digital search engine interfaces, hinting to the unordinary circumstances in which this project transpired. Originally only interested in the physical experience, I delved deeper into the meaning of archives through the comparison of with the experience of working in a digital archive. I explore digital archives beyond the typical investigation of mimicry and medium; rather I help visualize archives as a more self-aware intrigue.
